Work Description

The transmission line to be supplied and constructed under this Invitation is 230 kV, 50 Hz, 3 phase, quad-bundled conductor per phase, double circuit on self-supporting lattice steel towers extending from Khon Kaen 4 Junction to Khon Kaen 3 Substation in the northeastern region of Thailand, having a distance of approximately 19.3 kilometers on the existing right-of-way with 20 meters in width on each side of the center line of the transmission line.

The conductor to be employed will be 1272 MCM ACSR/GA supplied by EGAT. Two types of overhead ground wires will be employed; one of which is 3/8 inch nominal diameter, high strength galvanized steel overhead ground wire and the other is composite overhead ground wire with 36-core optical fiber. Both types of overhead ground wires shall be supplied by the Contractor.

The scope of Work under this Invitation shall also include supply and construction of temporary detour line. This line is 230 kV, 50 Hz, 3 phase, single conductor per phase, double circuit extending from Khon Kaen 4 Junction to Khon Kaen 3 Substation, having a distance of approximately 19.4 kilometers on the edge of the existing right-of-way with 20 meters in width on each side of the center line of the transmission line. The 1272 MCM ACSR/GA conductor and the composite overhead ground wire with 36-core optical fiber will be employed for this temporary detour line. The conductor will be supplied by EGAT whereas the overhead ground wire shall be supplied by the Contractor. It shall be noted that the temporary detour line shall be constructed as indicated in the Specifications No. TL-05 (Rev.1) : Construction of Temporary Detour Line.

The dismantling Work of the existing 230 kV Khon Kaen 4 Junction – Khon Kaen 3 Transmission Line which is double circuit strung with 1272 MCM ACSR/GA conductor as well as the 230 kV temporary detour line mentioned above shall also be performed under this Invitation. All dismantling Work shall be conducted in accordance with the requirements in Specifications No. TL-07 (Rev.3) : Dismantling Work. All types of steel towers and foundations have already been designed by EGAT. Furthermore, the fabrication / erection drawings as well as stub & setting dimensions and details & bar bending schedule of foundations for all tower types will be prepared and provided to the Contractor by EGAT.

However, the Contractor shall also note that the detailed fabrication / erection drawings for some tower leg extensions as well as stub & setting dimensions for some tower types may not be available. In such case, the Contractor shall perform and provide these drawings for EGAT's approval.

Detailed fabrication/erection drawings of steel towers provided by EGAT will be furnished to the Contractor after Award of the Contract. The Contractor shall carefully scrutinize EGAT's furnished detailed fabrication/erection drawings, make minor modifications as necessary and submit all revised drawings to EGAT for review and approval. The full responsibility for adequacy and accuracy of all detailed drawings shall rest with the Contractor and he shall have no right to claim for additional compensation as a result of his misinterpretation or failure to check the drawings for compliance with the design requirements, inaccuracies, errors and omissions.

Reproducible drawings and CD-ROM of EGAT's furnished detailed fabrication / erection drawings of steel towers will not be required. The approved drawings, reproducible drawings and CD-ROM of these steel towers required to be submitted for this Contract shall therefore be bill of material. However, in case the Contractor makes modifications to EGAT's furnished detailed fabrication / erection drawings of steel towers or prepares drawings of which leg extensions and/or stub & setting dimensions are not available, such drawings shall be submitted for EGAT's approval and therefore reproducible drawings and CD-ROM of these drawings shall be required.

The Contractor shall also be responsible for the design of any other necessary parts for completion of the Work, including the manufacture, supply, testing, construction and installation of the various components of the transmission line.
